The large and growing pools of wealth in the Middle East, Africa and South Asia (MEASA) region are creating an increasingly urgent need for specialist fund management services.

Both institutions and high-net-worth individuals are looking for regionally based experts to address their complex investment requirements.

DIFC's legislative and regulatory regime provides a highly supportive and secure environment for local, regional and global players to domicile, manage and distribute funds. It's no wonder that DIFC continues to set the pace as the region's largest fund management jurisdiction.

Fund Management is one of four areas within the Wealth and Asset Management focus at DIFC. The other areas include <u>Asset Management</u>, <u>Private Equity</u>, and <u>Wealth Management</u>.
